Experience

- **Employer:** Working as (SENIOR SOFTWARE ENGINEER) with Sutherland Global.
- **Project:** Velosidy SAAS
- **Client:** FINVI-OASIS
- **Role:** Sr. UI/UX Designer

- **Duration:** June 2022 - April 2024

Description: FINVI is a debt collection platform that provides software solutions for first-party and second-party financial firms. This platform facilitates the process of pursuing payments of debts owed by individuals or businesses. It integrates state-of-the-art technology, automated communication, and advanced analytics to optimize workflows. With user-friendly interfaces and stringent security measures, FINVI enables efficient management of debt portfolios, ensuring successful collection outcomes.

Responsibilities:

- Evaluate and collect all user requirements, and collaborate with product engineers and managers.
- To illustrate design concepts, Sitemaps, Userflows, Wireframe and Storyboard.
- Create graphic user interface elements such as tabs, widgets, and menus.
- Create UI Mockups and prototypes that clearly show how sites work and look.
- Rough drafts should be prepared and presented to internal teams and key stakeholders.
- Identify and resolve UX issues.
- Make layout changes based on client feedback.

Environment: Adobe Creative Suits, Figma, Confluence, Jira

- **Employer:** Working as (SENIOR SOFTWARE ENGINEER) with Sutherland Global.
- **Project:** WiTT 2.0
- **Client:** WiTT Forever
- **Role:** Sr. UI/UX Designer
- **Duration:** June 2024 - Sept 2024

Description: WiTT Forever (wittforever.com) is a website for the WiTT Support Registry, a social platform designed to make it easier for people to ask for and receive help. Individuals can create a list of specific needs or assistance they require. This could be anything from financial support during a medical condition to help with childcare or transportation. Friends, family, and the broader community can browse these registries, choose how they can contribute, and offer assistance directly or contribute financially. WiTT aims to normalize asking for help by providing a structured and comfortable way to do so. Donors can contribute to specific needs, ensuring their support aligns with the recipient's requirements.
Users can outline their exact needs and receive support tailored to their situation.

Responsibilities:

- Evaluate and collect all user requirements, and collaborate with product engineers and managers.
- To illustrate design concepts, Sitemaps, Userflows, Wireframe and Storyboard.
- Create graphic user interface elements such as tabs, widgets, and menus.
- Create UI Mockups and prototypes that clearly show how sites work and look.
- Rough drafts should be prepared and presented to internal teams and key stakeholders.
- Identify and resolve UX issues.
- Make layout changes based on client feedback.

Environment: Adobe Creative Suits, Figma, Confluence, Jira
